## **PROJECT EXPERIENCE**

# Food Ordering/Deliver Management System

Feb 2023 - Apr 2023

- Crafted innovative food ordering/delivery management system using Mysql & PowerBI to optimize business processes, leading to increased customer satisfaction by 20%.
- Configured reporting dashboard with PowerBI for real-time insights & transparent customer tracking, allowing for comprehensive visualization of project performance data.

MentorHub Oct 2022 - Dec 2022

- Utilized MongoDB alongside Mongoose library to implement database operations, increasing data recall capabilities by 25%.
- Developed APIs using Nest.js environment & JWT tokens powered by Passport.js to improve system authorization & authentication.
- Optimized UX and UI design using React and NextJS to meet accessibility standards and deliver an improved user experience, resulting in a 5% positive feedback increase.

### **Keys - Student Accommodation Management**

Oct 2022 - Dec 2022

- Adopted Abstract Factory Pattern to facilitate functionality enhancements, resulting in improved usability from 40% to 90%.
- Developed widgets incorporating graphs & email notifications for an enhanced user experience, contributing to a 50% rise in monthly user engagement.

## PHOTOGRAPHY EXPERIENCE

- I served as the president of the college photography club throughout my undergraduate studies, which spanned a period of three years.
- Collaborated with in-house photographers and creative designers during college cultural festival for four consecutive years
- Organized photo walks and photography learning session for the aspirant photographer to learn basics of photography
- My photography has been showcased on various reputable social media platforms.
- As the president of the photography club, I established and led a team of highly skilled photographers who were trained to document the cultural events of our college.
